

## **scholar@uc** Elevator Speech

*"What's new in the library?"*

We have a new digital repository where you – or your grad student or delegate – can deposit your works, data, analysis – anything you might want to preserve digitally and make available world-wide. There's no cost to you. It supports permanent DOIs, great findability on the web, aggregation tools, embargo options, metrics, etc. and we're still improving it and looking for feedback.

**scholar@uc** – have you heard of it?
